NOTE: Opioid misuse refers to the use of heroin or the misuse of prescription pain relievers. Misuse of prescription pain relievers is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription pain relievers do not include over-the-counter drugs.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *hydrocodone products* (Vicodin<sup>®</sup>, Lortab<sup>®</sup>, Norco<sup>®</sup>, Zohydro<sup>®</sup> ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin<sup>®</sup>, Percocet<sup>®</sup>, Percodan<sup>®</sup>, Roxicodone<sup>®</sup>, generic oxycodone, or other similar products); *tramadol products* (Ultram<sup>®</sup>, Ultram<sup>®</sup> ER, Ultracet<sup>®</sup>, generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol<sup>®</sup> with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza<sup>®</sup>, Kadian<sup>®</sup>, MS Contin<sup>®</sup>, generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Duragesic<sup>®</sup>, Fentora<sup>®</sup>, generic fentanyl, or other similar products); *buprenorphine products* (Suboxone<sup>®</sup>, generic buprenorphine, generic buprenorphine plus naloxone, or other similar products); *oxymorphone products* (Opana<sup>®</sup>, Opana<sup>®</sup> ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol<sup>®</sup> or other similar products); *hydromorphone products* (Dilaudid<sup>®</sup> or generic hydromorphone, Exalgo<sup>®</sup> or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

<sup>2</sup> Includes use or misuse of pain relievers containing other active ingredients. Reports of misuse of "any other prescription pain reliever" that correspond only to the specific pain reliever categories shown in the table are excluded from estimates for Any Other Prescription Pain Reliever and are included instead in the relevant pain reliever category. Due to changes in how these reports of misuse of "any other prescription pain reliever" were assigned, the 2016 estimates may differ from previously published estimates.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *hydrocodone products* (Vicodin<sup>®</sup>, Lortab<sup>®</sup>, Norco<sup>®</sup>, Zohydro<sup>®</sup> ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin<sup>®</sup>, Percocet<sup>®</sup>, Percodan<sup>®</sup>, Roxicodone<sup>®</sup>, generic oxycodone, or other similar products); *tramadol products* (Ultram<sup>®</sup>, Ultram<sup>®</sup> ER, Ultracet<sup>®</sup>, generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol<sup>®</sup> with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza<sup>®</sup>, Kadian<sup>®</sup>, MS Contin<sup>®</sup>, generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Duragesic<sup>®</sup>, Fentora<sup>®</sup>, generic fentanyl, or other similar products); *buprenorphine products* (Suboxone<sup>®</sup>, generic buprenorphine, generic buprenorphine plus naloxone, or other similar products); *oxymorphone products* (Opana<sup>®</sup>, Opana<sup>®</sup> ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol<sup>®</sup> or other similar products); *hydromorphone products* (Dilaudid<sup>®</sup> or generic hydromorphone, Exalgo<sup>®</sup> or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

<sup>2</sup> Includes use or misuse of pain relievers containing other active ingredients. Reports of misuse of "any other prescription pain reliever" that correspond only to the specific pain reliever categories shown in the table are excluded from estimates for Any Other Prescription Pain Reliever and are included instead in the relevant pain reliever category. Due to changes in how these reports of misuse of "any other prescription pain reliever" were assigned, the 2016 estimates may differ from previously published estimates.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *hydrocodone products* (Vicodin<sup>®</sup>, Lortab<sup>®</sup>, Norco<sup>®</sup>, Zohydro<sup>®</sup> ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin<sup>®</sup>, Percocet<sup>®</sup>, Percodan<sup>®</sup>, Roxicodone<sup>®</sup>, generic oxycodone, or other similar products); *tramadol products* (Ultram<sup>®</sup>, Ultram<sup>®</sup> ER, Ultracet<sup>®</sup>, generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol<sup>®</sup> with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza<sup>®</sup>, Kadian<sup>®</sup>, MS Contin<sup>®</sup>, generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Duragesic<sup>®</sup>, Fentora<sup>®</sup>, generic fentanyl, or other similar products); *buprenorphine products* (Suboxone<sup>®</sup>, generic buprenorphine, generic buprenorphine plus naloxone, or other similar products); *oxymorphone products* (Opana<sup>®</sup>, Opana<sup>®</sup> ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol<sup>®</sup> or other similar products); *hydromorphone products* (Dilaudid<sup>®</sup> or generic hydromorphone, Exalgo<sup>®</sup> or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

<sup>2</sup> Includes use or misuse of pain relievers containing other active ingredients. Reports of misuse of "any other prescription pain reliever" that correspond only to the specific pain reliever categories shown in the table are excluded from estimates for Any Other Prescription Pain Reliever and are included instead in the relevant pain reliever category. Due to changes in how these reports of misuse of "any other prescription pain reliever" were assigned, the 2016 estimates may differ from previously published estimates.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *benzodiazepine tranquilizers* (see footnote 2), *muscle relaxants* (see footnote 3), or any other prescription tranquilizer (see footnote 4).

<sup>2</sup> Includes *alprazolam products* (Xanax<sup>®</sup>, Xanax<sup>®</sup> XR, generic alprazolam, generic extended-release alprazolam, or other similar products); *lorazepam products* (Ativan<sup>®</sup>, generic lorazepam, or other similar products); *clonazepam products* (Klonopin<sup>®</sup>, generic clonazepam, or other similar products); *diazepam products* (Valium<sup>®</sup>, generic diazepam, or other similar products); or other benzodiazepine tranquilizers that were specified for misuse of "any other prescription tranquilizer."

<sup>3</sup> Includes *cyclobenzaprine products* (Flexeril<sup>®</sup>, generic cyclobenzaprine, or other similar products); *carisoprodol products* (Soma<sup>®</sup> or other similar products); or other muscle relaxants that were specified for misuse of "any other prescription tranquilizer."

<sup>4</sup> Includes use or misuse of tranquilizers containing other active ingredients. Reports of misuse of "any other prescription tranquilizer" that correspond only to the specific tranquilizer categories shown in the table are excluded from estimates for Any Other Prescription Tranquilizer and are included instead in the relevant tranquilizer category. Due to changes in how these reports of misuse of "any other prescription tranquilizer" were assigned, the 2016 estimates may differ from previously published estimates.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *amphetamine products* (Adderall<sup>®</sup>, Adderall<sup>®</sup> XR, Dexedrine<sup>®</sup>, Vyvanse<sup>®</sup>, generic dextroamphetamine, generic amphetamine-dextroamphetamine combinations, generic extended-release amphetamine-dextroamphetamine combinations, or similar products); *methylphenidate products* (Ritalin<sup>®</sup>, Ritalin<sup>®</sup> LA, Concerta<sup>®</sup>, Daytrana<sup>®</sup>, Metadate CD, Metadate ER, Focalin, Focalin XR, generic methylphenidate, generic extended-release methylphenidate, generic dexmethylphenidate, generic extended-release dexmethylphenidate, or similar products); *anorectic (weight-loss) stimulants* (Didrex<sup>®</sup>, benzphetamine, Tenuate<sup>®</sup>, diethylpropion, phendimetrazine, phentermine or similar products); *modafinil products* (Provigil<sup>®</sup> or other similar products); or any other prescription stimulant.

<sup>2</sup> Includes amphetamine and methylphenidate products that are primarily prescribed for the treatment of attention-deficit/hyperactivity disorder (ADHD). Vyvanse<sup>®</sup> is included with amphetamine products because its active ingredient (lisdexamfetamine) is metabolized to dextroamphetamine.

<sup>3</sup> Includes use or misuse of stimulants containing other active ingredients. Reports of misuse of "any other prescription stimulant" that correspond only to the specific stimulant categories shown in the table are excluded from estimates for Any Other Prescription Stimulant and are included instead in the relevant stimulant category. Due to changes in how these reports of misuse of "any other prescription stimulant" were assigned, the 2016 estimates may differ from previously published estimates.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *amphetamine products* (Adderall<sup>®</sup>, Adderall<sup>®</sup> XR, Dexedrine<sup>®</sup>, Vyvanse<sup>®</sup>, generic dextroamphetamine, generic amphetamine-dextroamphetamine combinations, generic extended-release amphetamine-dextroamphetamine combinations, or similar products); *methylphenidate products* (Ritalin<sup>®</sup>, Ritalin<sup>®</sup> LA, Concerta<sup>®</sup>, Daytrana<sup>®</sup>, Metadate CD, Metadate ER, Focalin, Focalin XR, generic methylphenidate, generic extended-release methylphenidate, generic dexmethylphenidate, generic extended-release dexmethylphenidate, or similar products); *anorectic (weight-loss) stimulants* (Didrex<sup>®</sup>, benzphetamine, Tenuate<sup>®</sup>, diethylpropion, phendimetrazine, phentermine or similar products); *modafinil products* (Provigil<sup>®</sup> or other similar products); or any other prescription stimulant.

<sup>2</sup> Includes amphetamine and methylphenidate products that are primarily prescribed for the treatment of attention-deficit/hyperactivity disorder (ADHD). Vyvanse<sup>®</sup> is included with amphetamine products because its active ingredient (lisdexamfetamine) is metabolized to dextroamphetamine.

<sup>3</sup> Includes use or misuse of stimulants containing other active ingredients. Reports of misuse of "any other prescription stimulant" that correspond only to the specific stimulant categories shown in the table are excluded from estimates for Any Other Prescription Stimulant and are included instead in the relevant stimulant category. Due to changes in how these reports of misuse of "any other prescription stimulant" were assigned, the 2016 estimates may differ from previously published estimates.

NOTE: Any Use of prescription psychotherapeutics is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription psychotherapeutics. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *zolpidem products* (Ambien<sup>®</sup>, Ambien<sup>®</sup> CR, generic zolpidem, generic extended-release zolpidem, or similar products); *eszopiclone products* (Lunesta<sup>®</sup>, generic eszopiclone, or similar products); *zaleplon products* (Sonata<sup>®</sup>, generic zaleplon, or similar products); *benzodiazepine sedatives* (see footnote 2); *barbiturates* (Butisol<sup>®</sup>, Seconal<sup>®</sup>, phenobarbital, or similar products); or any other prescription sedative.

<sup>2</sup> Includes *flurazepam products* (flurazepam [also known as Dalmane<sup>®</sup>] or other similar products), *temazepam products* (Restoril<sup>®</sup>, generic temazepam, or other similar products); *triazolam products* (Halcion<sup>®</sup>, generic triazolam, or other similar products); or other benzodiazepine sedatives that were specified for misuse of "any other prescription sedative."

<sup>3</sup> Includes use or misuse of sedatives containing other active ingredients. Reports of misuse of "any other prescription sedative" that correspond only to the specific sedative categories shown in the table are excluded from estimates for Any Other Prescription Sedative and are included instead in the relevant sedative category. Due to changes in how these reports of misuse of "any other prescription sedative" were assigned, the 2016 estimates may differ from previously published estimates.

Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Includes *zolpidem products* (Ambien<sup>®</sup>, Ambien<sup>®</sup> CR, generic zolpidem, generic extended-release zolpidem, or similar products); *eszopiclone products* (Lunesta<sup>®</sup>, generic eszopiclone, or similar products); *zaleplon products* (Sonata<sup>®</sup>, generic zaleplon, or similar products); *benzodiazepine sedatives* (see footnote 2); *barbiturates* (Butisol<sup>®</sup>, Seconal<sup>®</sup>, phenobarbital, or similar products); or any other prescription sedative.

<sup>2</sup> Includes *flurazepam products* (flurazepam [also known as Dalmane<sup>®</sup>] or other similar products), *temazepam products* (Restoril<sup>®</sup>, generic temazepam, or other similar products); *triazolam products* (Halcion<sup>®</sup>, generic triazolam, or other similar products); or other benzodiazepine sedatives that were specified for misuse of "any other prescription sedative."

<sup>3</sup> Includes use or misuse of sedatives containing other active ingredients. Reports of misuse of "any other prescription sedative" that correspond only to the specific sedative categories shown in the table are excluded from estimates for Any Other Prescription Sedative and are included instead in the relevant sedative category. Due to changes in how these reports of misuse of "any other prescription sedative" were assigned, the 2016 estimates may differ from previously published estimates.

<sup>1</sup> Tobacco Products include cigarettes, smokeless tobacco (i.e., snuff, dip, chewing tobacco, or "snus"), cigars, or pipe tobacco. Tobacco Product use in the past year excludes past year pipe tobacco use, but includes past month pipe tobacco use.

<sup>2</sup> Information about past year use of pipe tobacco was not collected.

<sup>3</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

NOTE: Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

NOTE: Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

NOTE: Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

NOTE: Tobacco Products include cigarettes, smokeless tobacco (i.e., snuff, dip, chewing tobacco, or "snus"), cigars, or pipe tobacco. Tobacco Product use in the past year excludes past year pipe tobacco use, but includes past month pipe tobacco use.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Tobacco Products include cigarettes, smokeless tobacco (i.e., snuff, dip, chewing tobacco, or "snus"), cigars, or pipe tobacco. Tobacco Product use in the past year excludes past year pipe tobacco use, but includes past month pipe tobacco use.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

<sup>1</sup> Tobacco Products include cigarettes, smokeless tobacco (i.e., snuff, dip, chewing tobacco, or "snus"), cigars, or pipe tobacco. Tobacco Product use in the past year excludes past year pipe tobacco use, but includes past month pipe tobacco use.

<sup>2</sup> Information about past year use of pipe tobacco was not collected.

<sup>3</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

<sup>1</sup> Tobacco Products include cigarettes, smokeless tobacco (i.e., snuff, dip, chewing tobacco, or "snus"), cigars, or pipe tobacco. Tobacco Product use in the past year excludes past year pipe tobacco use, but includes past month pipe tobacco use.

<sup>2</sup> Information about past year use of pipe tobacco was not collected.

<sup>3</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

NOTE: Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy Alcohol Use is defined as binge drinking on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

NOTE: Tobacco Products include cigarettes, smokeless tobacco (i.e., snuff, dip, chewing tobacco, or "snus"), cigars, or pipe tobacco. Tobacco Product use in the past year excludes past year pipe tobacco use, but includes past month pipe tobacco use.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> For the estimates shown in each row, Past Year Initiates are defined as persons who used the specific substance for the first time in the 12 months prior to the date of the interview.

<sup>2</sup> For the estimates shown in each row, Prior to Past Year Initiates are defined as persons who used the specific substance for the first time more than 12 months prior to the date of the interview.

<sup>3</sup> Response categories for the Perception of Risk questions include "No risk," "Slight risk," "Moderate risk," and "Great risk." The estimates in this table correspond to persons reporting "Great risk." Respondents with unknown Perception of Risk data were excluded from the respective analyses.

<sup>4</sup> Response categories for the Perceived Availability questions pertaining to the listed illicit drugs include "Probably impossible," "Very difficult," "Fairly difficult," "Fairly easy," and "Very easy." The estimates in this table correspond to persons reporting "Fairly easy" or "Very easy." Respondents with unknown Perceived Availability data were excluded from the respective analyses.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents with unknown Student Characteristics data were excluded from the respective analyses.

NOTE: Youths who did not report their school enrollment status or reported not being enrolled in school in the past 12 months were excluded from this analysis. Youths reporting that they were "home-schooled" in the past 12 months were considered to be enrolled in school.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> The number of activities participated in is based on four questions: participation in school-based activities, community-based activities, church or faith-based activities, and other activities. For each question, the response categories include "None," "One," "Two," and "3 or more." Respondents were excluded from the analysis if they had unknown data for at least three of the questions and if their known responses did not place them in the recoded "Two or more" category.

<sup>2</sup> Drug or Alcohol Prevention Messages Seen or Heard in School includes respondents who reported having a special class about drugs or alcohol in school or having had films, lectures, discussion, or printed information about drugs or alcohol in a regular school class, such as health or physical education, or outside of a regular school class, such as in a special assembly.

<sup>3</sup> Response categories for the School Satisfaction question include "You liked going to school a lot," "You kind of liked going to school," "You didn't like going to school very much," and "You hated going to school." The estimates in this table correspond to persons reporting "You liked going to school a lot" or "You kind of liked going to school."

<sup>4</sup> Response categories for the Grade Average question include "An 'A+', 'A,' or 'A-minus' average"; "A 'B+', 'B,' or 'B-minus' average"; "A 'C+', 'C,' or 'C-minus' average"; "A 'D' or less than a 'D' average"; and "My school does not give these grades." The estimates in this table correspond to persons reporting "A 'D' or less than a 'D' average." Respondents reporting that their school does not give these grades were excluded from the analysis.

<sup>5</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2017.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents with unknown Prevention Programs and Messages Exposure or Delinquent Behavior data were excluded from the respective analyses.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>3</sup> Respondents were asked how many times they participated in a delinquent behavior in the past year and were categorized as having participated if they indicated taking part in the particular behavior at least one time.

Students in Youth's Grade Get Drunk at Least Once a Week	507	1,270	452	1,029	219	473	416	807

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents with unknown Student Characteristics, Adult Involvement, or Substance Use in Grade Level data were excluded from the respective analyses.

NOTE: Youths who did not report their school enrollment status or reported not being enrolled in school in the past 12 months were excluded from this analysis.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>3</sup> Youths reporting that they were "home-schooled" in the past 12 months were considered to be enrolled in school.

<sup>4</sup> The number of activities participated in is based on four questions: participation in school-based activities, community-based activities, church or faith-based activities, and other activities. For each question, the response categories include "None," "One," "Two," and "3 or more." Respondents were excluded from the analysis if they had unknown data for at least three of the questions and if their known responses did not place them in the recoded "Two or more" category.

<sup>5</sup> Drug or Alcohol Prevention Messages Seen or Heard in School includes respondents who reported having a special class about drugs or alcohol in school or having had films, lectures, discussion, or printed information about drugs or alcohol in a regular school class, such as health or physical education, or outside of a regular school class, such as in a special assembly.

<sup>6</sup> Response categories for the School Satisfaction question include "You liked going to school a lot," "You kind of liked going to school," "You didn't like going to school very much," and "You hated going to school." The estimates in this table correspond to persons reporting "You liked going to school a lot" or "You kind of liked going to school."

<sup>7</sup> Response categories for the Grade Average question include "An 'A+', 'A,' or 'A-minus' average"; "A 'B+', 'B,' or 'B-minus' average"; "A 'C+', 'C,' or 'C-minus' average"; "A 'D' or less than a 'D' average"; and "My school does not give these grades." The estimates in this table correspond to persons reporting "A 'D' or less than a 'D' average." Respondents reporting that their school does not give these grades were excluded from the analysis.

<sup>8</sup> Response categories for the Adult Involvement questions include "Always," "Sometimes," "Seldom," and "Never." The estimates in this table correspond to persons reporting "Always" or "Sometimes."

<sup>9</sup> Response categories for the Substance Use in Grade Level questions include "All of them," "Most of them," "A few of them," and "None of them." The estimates in this table correspond to persons reporting "All of them" or "Most of them." Youths reporting that they were "home-schooled" in the past 12 months were not considered to be enrolled in school.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents with unknown Student Characteristics, Adult Involvement, or Substance Use in Grade Level data were excluded from the respective analyses.

NOTE: Youths who did not report their school enrollment status or reported not being enrolled in school in the past 12 months were excluded from this analysis.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>3</sup> Youths reporting that they were "home-schooled" in the past 12 months were considered to be enrolled in school.

<sup>4</sup> The number of activities participated in is based on four questions: participation in school-based activities, community-based activities, church or faith-based activities, and other activities. For each question, the response categories include "None," "One," "Two," and "3 or more." Respondents were excluded from the analysis if they had unknown data for at least three of the questions and if their known responses did not place them in the recoded "Two or more" category.

<sup>5</sup> Drug or Alcohol Prevention Messages Seen or Heard in School includes respondents who reported having a special class about drugs or alcohol in school or having had films, lectures, discussion, or printed information about drugs or alcohol in a regular school class, such as health or physical education, or outside of a regular school class, such as in a special assembly.

<sup>6</sup> Response categories for the School Satisfaction question include "You liked going to school a lot," "You kind of liked going to school," "You didn't like going to school very much," and "You hated going to school." The estimates in this table correspond to persons reporting "You liked going to school a lot" or "You kind of liked going to school."

<sup>7</sup> Response categories for the Grade Average question include "An 'A+', 'A,' or 'A-minus' average"; "A 'B+', 'B,' or 'B-minus' average"; "A 'C+', 'C,' or 'C-minus' average"; "A 'D' or less than a 'D' average"; and "My school does not give these grades." The estimates in this table correspond to persons reporting "A 'D' or less than a 'D' average." Respondents reporting that their school does not give these grades were excluded from the analysis.

<sup>8</sup> Response categories for the Adult Involvement questions include "Always," "Sometimes," "Seldom," and "Never." The estimates in this table correspond to persons reporting "Always" or "Sometimes."

<sup>9</sup> Response categories for the Substance Use in Grade Level questions include "All of them," "Most of them," "A few of them," and "None of them." The estimates in this table correspond to persons reporting "All of them" or "Most of them." Youths reporting that they were "home-schooled" in the past 12 months were not considered to be enrolled in school.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents with unknown Student Characteristics data were excluded from the respective analyses.

NOTE: Youths who did not report their school enrollment status or reported not being enrolled in school in the past 12 months were excluded from this analysis. Youths reporting that they were "home-schooled" in the past 12 months were considered to be enrolled in school.

<sup>1</sup> The number of activities participated in is based on four questions: participation in school-based activities, community-based activities, church or faith-based activities, and other activities. For each question, the response categories include "None," "One," "Two," and "3 or more." Respondents were excluded from the analysis if they had unknown data for at least three of the questions and if their known responses did not place them in the recoded "Two or more" category.

<sup>2</sup> Drug or Alcohol Prevention Messages Seen or Heard in School includes respondents who reported having a special class about drugs or alcohol in school or having had films, lectures, discussion, or printed information about drugs or alcohol in a regular school class, such as health or physical education, or outside of a regular school class, such as in a special assembly.

<sup>3</sup> Response categories for the School Satisfaction question include "You liked going to school a lot," "You kind of liked going to school," "You didn't like going to school very much," and "You hated going to school." The estimates in this table correspond to persons reporting "You liked going to school a lot" or "You kind of liked going to school."

<sup>4</sup> Response categories for the Grade Average question include "An 'A+,' 'A,' or 'A-minus' average"; "A 'B+,' 'B,' or 'B-minus' average"; "A 'C+,' 'C,' or 'C-minus' average"; "A 'D' or less than a 'D' average"; and "My school does not give these grades." The estimates in this table correspond to persons reporting "A 'D' or less than a 'D' average." Respondents reporting that their school does not give these grades were excluded from the analysis.

<sup>5</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2017.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

NOTE: Respondents with unknown Perceptions of Parents' Feelings data were excluded from the respective analyses.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2017.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents with unknown Student Characteristics, Adult Involvement, or Substance Use in Grade Level data were excluded from the respective analyses.

NOTE: Youths who did not report their school enrollment status or reported not being enrolled in school in the past 12 months were excluded from this analysis.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>3</sup> Youths reporting that they were "home-schooled" in the past 12 months were considered to be enrolled in school.

<sup>4</sup> The number of activities participated in is based on four questions: participation in school-based activities, community-based activities, church or faith-based activities, and other activities. For each question, the response categories include "None," "One," "Two," and "3 or more." Respondents were excluded from the analysis if they had unknown data for at least three of the questions and if their known responses did not place them in the recoded "Two or more" category.

<sup>5</sup> Drug or Alcohol Prevention Messages Seen or Heard in School includes respondents who reported having a special class about drugs or alcohol in school or having had films, lectures, discussion, or printed information about drugs or alcohol in a regular school class, such as health or physical education, or outside of a regular school class, such as in a special assembly.

<sup>6</sup> Response categories for the School Satisfaction question include "You liked going to school a lot," "You kind of liked going to school," "You didn't like going to school very much," and "You hated going to school." The estimates in this table correspond to persons reporting "You liked going to school a lot" or "You kind of liked going to school."

<sup>7</sup> Response categories for the Grade Average question include "An 'A+', 'A,' or 'A-minus' average"; "A 'B+', 'B,' or 'B-minus' average"; "A 'C+', 'C,' or 'C-minus' average"; "A 'D' or less than a 'D' average"; and "My school does not give these grades." The estimates in this table correspond to persons reporting "A 'D' or less than a 'D' average." Respondents reporting that their school does not give these grades were excluded from the analysis.

<sup>8</sup> Response categories for the Adult Involvement questions include "Always," "Sometimes," "Seldom," and "Never." The estimates in this table correspond to persons reporting "Always" or "Sometimes."

<sup>9</sup> Response categories for the Substance Use in Grade Level questions include "All of them," "Most of them," "A few of them," and "None of them." The estimates in this table correspond to persons reporting "All of them" or "Most of them." Youths reporting that they were "home-schooled" in the past 12 months were not considered to be enrolled in school.

Students in Youth's Grade Get Drunk at Least Once a Week	1.35	0.27	1.25	0.24	0.96	0.16	1.25	0.21

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents with unknown Student Characteristics, Adult Involvement, or Substance Use in Grade Level data were excluded from the respective analyses.

NOTE: Youths who did not report their school enrollment status or reported not being enrolled in school in the past 12 months were excluded from this analysis.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Due to methodological changes, this estimate is not comparable with estimates from 2014 and prior years. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Binge Alcohol Use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

<sup>3</sup> Youths reporting that they were "home-schooled" in the past 12 months were considered to be enrolled in school.

<sup>4</sup> The number of activities participated in is based on four questions: participation in school-based activities, community-based activities, church or faith-based activities, and other activities. For each question, the response categories include "None," "One," "Two," and "3 or more." Respondents were excluded from the analysis if they had unknown data for at least three of the questions and if their known responses did not place them in the recoded "Two or more" category.

<sup>5</sup> Drug or Alcohol Prevention Messages Seen or Heard in School includes respondents who reported having a special class about drugs or alcohol in school or having had films, lectures, discussion, or printed information about drugs or alcohol in a regular school class, such as health or physical education, or outside of a regular school class, such as in a special assembly.

<sup>6</sup> Response categories for the School Satisfaction question include "You liked going to school a lot," "You kind of liked going to school," "You didn't like going to school very much," and "You hated going to school." The estimates in this table correspond to persons reporting "You liked going to school a lot" or "You kind of liked going to school."

<sup>7</sup> Response categories for the Grade Average question include "An 'A+', 'A,' or 'A-minus' average"; "A 'B+', 'B,' or 'B-minus' average"; "A 'C+', 'C,' or 'C-minus' average"; "A 'D' or less than a 'D' average"; and "My school does not give these grades." The estimates in this table correspond to persons reporting "A 'D' or less than a 'D' average." Respondents reporting that their school does not give these grades were excluded from the analysis.

<sup>8</sup> Response categories for the Adult Involvement questions include "Always," "Sometimes," "Seldom," and "Never." The estimates in this table correspond to persons reporting "Always" or "Sometimes."

<sup>9</sup> Response categories for the Substance Use in Grade Level questions include "All of them," "Most of them," "A few of them," and "None of them." The estimates in this table correspond to persons reporting "All of them" or "Most of them." Youths reporting that they were "home-schooled" in the past 12 months were not considered to be enrolled in school.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Past Year Initiates for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of past year initiates for the overall prescription psychotherapeutics category and consequently the overall illicit drugs category.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Persons at Risk for Initiation for a specific substance include those who did not use the substance (other than prescription psychotherapeutics) in their lifetime or who used the substance (other than prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of persons at risk for initiation for the specific and overall prescription psychotherapeutics categories and consequently the overall illicit drugs category.

<sup>2</sup> Past Year Users for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) in the past year.

<sup>3</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>4</sup> Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

<sup>5</sup> Daily Cigarette Use is defined as ever smoking every day for at least 30 days.

<sup>6</sup> Smokeless Tobacco includes snuff, dip, chewing tobacco, or "snus."

NOTE: Past Year Initiates for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of past year initiates for the overall prescription psychotherapeutics category and consequently the overall illicit drugs category.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Persons at Risk for Initiation for a specific substance include those who did not use the substance (other than prescription psychotherapeutics) in their lifetime or who used the substance (other than prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of persons at risk for initiation for the specific and overall prescription psychotherapeutics categories and consequently the overall illicit drugs category.

<sup>2</sup> Past Year Users for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) in the past year.

<sup>3</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>4</sup> Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

<sup>5</sup> Daily Cigarette Use is defined as ever smoking every day for at least 30 days.

<sup>6</sup> Smokeless Tobacco includes snuff, dip, chewing tobacco, or "snus."

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Past Year Initiates for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of past year initiates for the overall prescription psychotherapeutics category and consequently the overall illicit drugs category.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>2</sup> Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

<sup>3</sup> Daily Cigarette Use is defined as ever smoking every day for at least 30 days.

<sup>4</sup> Smokeless Tobacco includes snuff, dip, chewing tobacco, or "snus."

NOTE: Past Year Initiates for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of past year initiates for the overall prescription psychotherapeutics category and consequently the overall illicit drugs category.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Persons at Risk for Initiation for a specific substance include those who did not use the substance (other than prescription psychotherapeutics) in their lifetime or who used the substance (other than prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of persons at risk for initiation for the specific and overall prescription psychotherapeutics categories and consequently the overall illicit drugs category.

<sup>2</sup> Past Year Users for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) in the past year.

<sup>3</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>4</sup> Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

<sup>5</sup> Daily Cigarette Use is defined as ever smoking every day for at least 30 days.

<sup>6</sup> Smokeless Tobacco includes snuff, dip, chewing tobacco, or "snus."

NOTE: Past Year Initiates for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of past year initiates for the overall prescription psychotherapeutics category and consequently the overall illicit drugs category.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Persons at Risk for Initiation for a specific substance include those who did not use the substance (other than prescription psychotherapeutics) in their lifetime or who used the substance (other than prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of persons at risk for initiation for the specific and overall prescription psychotherapeutics categories and consequently the overall illicit drugs category.

<sup>2</sup> Past Year Users for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) in the past year.

<sup>3</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>4</sup> Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

<sup>5</sup> Daily Cigarette Use is defined as ever smoking every day for at least 30 days.

<sup>6</sup> Smokeless Tobacco includes snuff, dip, chewing tobacco, or "snus."

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Past Year Initiates for a specific substance include those who used that substance (misused in the case of prescription psychotherapeutics) for the first time in the past year. Methodological limitations preclude the estimation of past year initiates for the overall prescription psychotherapeutics category and consequently the overall illicit drugs category.

NOTE: Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

<sup>2</sup> Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

<sup>3</sup> Daily Cigarette Use is defined as ever smoking every day for at least 30 days.

<sup>4</sup> Smokeless Tobacco includes snuff, dip, chewing tobacco, or "snus."

NOTE: Substance Use Disorder is defined as meeting criteria for illicit drug or alcohol dependence or abuse. Dependence or abuse is based on definitions found in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

NOTE: Received Both Illicit Drug and Alcohol Treatment refers to treatment received in order to reduce or stop illicit drug and alcohol use, or for medical problems associated with illicit drug and alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Received Both Illicit Drug and Alcohol Treatment refers to treatment received in order to reduce or stop illicit drug and alcohol use, or for medical problems associated with illicit drug and alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s); therefore, the substance-specific estimates may not sum to this combined row.

Illicit Drugs but Not Alcohol	27.5	31.3	25.8	36.1	27.6	31.1	34.1	36.2	26.2	30.0
Alcohol but Not Illicit Drugs	30.8	31.5	11.9	9.7	31.7	32.5	22.8	22.5	33.6	34.5

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s); therefore, the substance-specific estimates may not sum to this combined row.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

NOTE: Received Both Illicit Drug and Alcohol Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug and alcohol use, or for medical problems associated with illicit drug and alcohol use.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Received Substance Use Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

<sup>3</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>4</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>5</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>6</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for the plan.

<sup>7</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Received Substance Use Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

<sup>3</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>4</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>5</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>6</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for the plan.

<sup>7</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: If respondents reported that they were currently receiving treatment, they were asked questions regarding the sources of payment for their current treatment; otherwise, questions pertained to the last treatment they received.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Received Substance Use Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Respondents could indicate multiple sources of payment for their last or current treatment; thus, these response categories are not mutually exclusive.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Received Substance Use Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use.

<sup>2</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>3</sup> Received Substance Use Treatment at a Non-Specialty Facility refers to treatment received at any location other than a specialty facility.

<sup>4</sup> Unknown Facility Type includes all respondents with insufficient information to definitively classify in which facility type(s) they received treatment regardless of whether they received treatment for alcohol, illicit drugs, or both.

<sup>5</sup> No Substance Use Treatment includes respondents who either did not receive substance use treatment for any substance in the past year or have unknown substance use treatment information.

NOTE: Respondents were classified as needing illicit drug treatment if they met the criteria for an illicit drug use disorder as defined in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV) or received treatment for illicit drug use at a specialty facility (i.e., drug and alcohol rehabilitation facility [inpatient or outpatient], hospital [inpatient only], or mental health center). Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Needing But Not Receiving Illicit Drug Treatment refers to respondents who are classified as needing illicit drug treatment, but who did not receive illicit drug treatment at a specialty facility.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Respondents were classified as needing illicit drug treatment if they met the criteria for an illicit drug use disorder as defined in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV) or received treatment for illicit drug use at a specialty facility (i.e., drug and alcohol rehabilitation facility [inpatient or outpatient], hospital [inpatient only], or mental health center). Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>a</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>b</sup> The difference between this estimate and the 2017 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

<sup>1</sup> Needing But Not Receiving Illicit Drug Treatment refers to respondents who are classified as needing illicit drug treatment, but who did not receive illicit drug treatment at a specialty facility.

<sup>2</sup> The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

<sup>1</sup> Needing But Not Receiving Illicit Drug Treatment refers to respondents who are classified as needing illicit drug treatment, but who did not receive illicit drug treatment at a specialty facility.

<sup>2</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>3</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18-22 who were living in a college dormitory were excluded.

<sup>4</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>5</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for the plan.

<sup>6</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Respondents were classified as needing substance use treatment if they met the criteria for an illicit drug or alcohol use disorder as defined in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV) or received treatment for illicit drug or alcohol use at a specialty facility (i.e., drug and alcohol rehabilitation facility [inpatient or outpatient], hospital [inpatient only], or mental health center). Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Respondents were classified as needing substance use treatment if they met the criteria for an illicit drug or alcohol use disorder as defined in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV) or received treatment for illicit drug or alcohol use at a specialty facility (i.e., drug and alcohol rehabilitation facility [inpatient or outpatient], hospital [inpatient only], or mental health center). Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Respondents were classified as needing substance use treatment if they met the criteria for an illicit drug or alcohol use disorder as defined in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)* or received treatment for illicit drug or alcohol use at a specialty facility (i.e., drug and alcohol rehabilitation facility [inpatient or outpatient], hospital [inpatient only], or mental health center). Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Needing But Not Receiving Substance Use Treatment refers to respondents who are classified as needing illicit drug or alcohol treatment, but who did not receive illicit drug or alcohol treatment at a specialty facility.

NOTE: Felt Need for Substance Use Treatment includes persons who did not receive but felt they needed illicit drug or alcohol treatment, as well as persons who received treatment at a location other than a specialty facility but felt they needed additional treatment.

<sup>1</sup> Respondents could indicate multiple reasons for not receiving treatment; thus, these response categories are not mutually exclusive.

NOTE: Substance Use Disorder is defined as meeting criteria for illicit drug or alcohol dependence or abuse. Dependence or abuse is based on definitions found in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Substance Use Disorder is defined as meeting criteria for illicit drug or alcohol dependence or abuse. Dependence or abuse is based on definitions found in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV).

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Alcohol Use Disorder is defined as meeting criteria for alcohol dependence or abuse. Dependence or abuse is based on definitions found in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*.

<sup>1</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>2</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>3</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>4</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for this plan.

<sup>5</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

NOTE: Received Both Illicit Drug and Alcohol Treatment refers to treatment received in order to reduce or stop illicit drug and alcohol use, or for medical problems associated with illicit drug and alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail. Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: If respondents reported that they were currently receiving treatment, they were asked questions regarding specific substances for their current treatment; otherwise, questions pertained to the last treatment they received.

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> Respondents could indicate multiple substances for which they received their last or current treatment; thus, these response categories are not mutually exclusive.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Received Substance Use Treatment refers to treatment received in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use. It includes treatment received at any location, such as a hospital (inpatient), rehabilitation facility (inpatient or outpatient), mental health center, emergency room, private doctor's office, self-help group, or prison/jail.

<sup>1</sup> Respondents could indicate multiple locations of treatment; thus, these response categories are not mutually exclusive.

NOTE: Received Illicit Drug Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug use, or for medical problems associated with illicit drug use.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>1</sup> The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Received Both Illicit Drug and Alcohol Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug and alcohol use, or for medical problems associated with illicit drug and alcohol use.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Received Substance Use Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

<sup>3</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>4</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>5</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>6</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for the plan.

<sup>7</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Received Substance Use Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug or alcohol use, or for medical problems associated with illicit drug or alcohol use.

<sup>1</sup> Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

<sup>2</sup> Estimates include persons who received treatment specifically for illicit drugs or alcohol, as well as persons who received treatment for unspecified substance(s).

<sup>3</sup> County Type is based on the 2013 Rural-Urban Continuum Codes.

<sup>4</sup> Estimates are based on a definition of Poverty Level that incorporates information on family income, size, and composition and is calculated as a percentage of the U.S. Census Bureau's poverty thresholds. Respondents aged 18 to 22 who were living in a college dormitory were excluded.

<sup>5</sup> Respondents could indicate multiple types of health insurance; thus, these response categories are not mutually exclusive.

<sup>6</sup> CHIP is the Children's Health Insurance Program. Individuals aged 19 or younger are eligible for the plan.

<sup>7</sup> Other Health Insurance is defined as having Medicare, CHAMPUS, TRICARE, CHAMPVA, the VA, military health care, or any other type of health insurance.

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: If respondents reported that they were currently receiving treatment, they were asked questions regarding the sources of payment for their current treatment; otherwise, questions pertained to the last treatment they received.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Misuse of prescription psychotherapeutics is defined as use in any way not directed by a doctor, including use without a prescription of one's own; use in greater amounts, more often, or longer than told; or use in any other way not directed by a doctor. Prescription psychotherapeutics do not include over-the-counter drugs.

NOTE: Received Illicit Drug Treatment at a Specialty Facility refers to treatment received at a hospital (inpatient only), rehabilitation facility (inpatient or outpatient), or mental health center in order to reduce or stop illicit drug use, or for medical problems associated with illicit drug use.

<sup>1</sup> Respondents could indicate multiple sources of payment for their last or current treatment; thus, these response categories are not mutually exclusive.
